VOLOME 1, ISSUE 2

JULY, 2012

Agendas Setting for Third People's Health Assembly

People's Health Movement Nepal Students' Circle and National Coordination Committee with the support of Resource Center for Primary Health Care (RECPHEC) organized the National consultative Meeting on Third People's Health Assembly " in 7th April 2012 in Rural Reconstruction Nepal (RRN), Gairidhara, Kathmandu. Program was started with the welcome speech of Mr.Shanta Lal Mulmi .He summarized history of People's Health Assembly since the 1st Assembly in Bangladesh where 70 participants of diverse field from Nepal had attended the assembly. He mentioned that PHM-NCC is not a project; it's the movement so it's still in the way of movement and informed that PHM in Nepal is not passive. Dr. Sarba Raj Khadka, Rural Reconstruction Nepal, PHM-NCC started his presentation thanking young group of student activist for sensitizing the National Circle which was a bit passive in these recent years. He rolled back to the history of world health movement since the Alma-Atta Declaration 1978. Prof. Dr. Mathura Prasad Shrestha in his introductory remarks mentioned that unless the people

Final photo sessions of participants

are aware the slogan of Health For All is only limited in the words, so the main way-out of attaining health for all is to create awareness among people. He stated that the main aim during the establishment of WHO during 1945 was to achieve highest possible health care for everybody. Which was later strategically explained by Alma-Ata Conference being target oriented i.e. Health For All by 2000 but the donors directly or indirectly molded it to fund oriented and made it unsuccessful. he focused that health care is not just the curative part , the preventive and promotive is also of great importance so the investment in the research and technological field should be increased by all the nation replacing the private empire from the health or else HFA will just be a theme. He said that development model should

replace the prescription model of health program. WHO and PHM should help to empower people in developmental paradigm. He quoted the Chinese system of "go to the village start from what they are , learn from them and they should be able to see we did it and after all the accomplishment of the task". The program was moved ahead with the introduction of PHM-NSC by Mr. Hari Aryal from Student Circle. Which was followed by the presentation of Tara Ballav Adhikari on "climate change and health", Aditya Shakya on 'Human Resources on Health' and Ishwar KC on Students for global health . After which there was the through discussions on the presentations and Neplease concern on PHA3 and was concluded with the closing remarks of the Dr. Nihal Singh from WHO office at Nepal. Who wished for the successful completion of PHA3.

Mr. Jyoti Baniya and Prof. Dr. Sarad Raj Onta delivering speech .

Public Lecture on “People’s Health Right: Consumer’s Perspective”

PHM-NSC organized Public Lecture on People’s Health Right: Consumer’s Perspective from Mr. Jyoti Baniya, General Secretary, Forum for Protection of Consumer Rights Nepal on May 2012. Mr. Baniya has been working and advocating for consumer rights protection in Nepal from long time, and is a renowned person. This program saw the huge participation from students, professionals and faculties of Institute of Medicine and others.

Mr. Baniya gave a highly influential and resourceful lecture on the issues of consumer right protection, its reality and student’s participation to support consumer’s right protection. This program was formally started with registration, followed by opening, introduction to PHM-NSC and finally closing remarks proceeding the lecture by Mr. Baniya.

PHM Theater on “The Day My God Died”

PHM-NSC has been regularly conducting PHM Theater where we feature inspiring, sensitive, resourceful documentaries and movies of global health flavor. In the same run, PHM-NSC showed The Day my God Died, which is a very empathetic documentary directed by Andrew Levine starring CNN Hero from Nepal “Anuradha Koirala” featured in Nepal and India on the growing problem of Child Sex trafficking, it presents the stories of young girls whose lives have been shattered by the child sex slave trade. The film provides actual footage from inside the brothels of Bombay, known even to the tourists as "The Cages," captured with "spy camera" technology.

International People’s Health University IPHU and PHA3

Activist from PHM-NSC, Mr. Shiva Raj Mishra and Mr. Pawan Acharya participated in International People’s Health University (IPHU Online) on Political Economy of Health from 26th April to 21st June 2012. This online IPHU had been participated by more than 80 activists from around the world, and was an interactive, live learning environment where students read, share, discuss and present their views in webinar. Best upon their performance on IPHU (online stage) they were also selected to IPHU (face to face), from 22nd June to 4th July and Third People’s Health Assembly, 6-11 June that will happen on Cape town, South Africa on the University of Western Cape.

PHM Discussion Forum

PHM-NSC conducted one day PHM discussion forum on to discuss on the agendas set for the Third people's Health Assembly. The participants were mostly students of Public Health, Nursing and Medicine, some young professional were also present.

At the beginning of the discussion forum participants were divided into three thematic groups to discussion on the issue of climate change and health, human resource management and students for global health. They had discussion on the group and presented their summary among the other participants using some traditional and modern method of presentation. The discussion forum enriched the participants understanding in global health issues through interactive learning environment.

PHM-Discussion forum was a participatory and integrative learning environment.

PHM Discussion Forum

PHM e-discussion Forum

It was not possible to collect views, suggestion and reflection on these thematic issues. So PHM-NSC decided to conduct E-Discussion forum which was totally new to PHM-NSC. These thematic issues where build in buzzing questions which the respondent had to answer through user login portal in web. Though its applicability was limited among the diverse groups of people which often do no have internet access, it provided a new learning into the new advocacy tool in 21st century.

e-Discussion forum on agendas for Upcoming Third People's Health Assembly on Capetown, South Africa

PHM Nepal Students Circle conducts regular discussion forum in different public health issues at local, national and in global level. PHM discussion forum are conducted in regular basis among the students, professionals and distinct faculties of Institute of Medicine and other institutions. Forums are participatory, inter-active and solution orientated. It uses different audiovisual methods with the blends of different fun games to increase peoples participation.

On this regard, e-Discussion forum on agendas for Upcoming Third People's Health Assembly on Capetown, South Africa has been organized from the initiative of Peoples Health Movement Nepal Students Circle to make your voice, different ideas and suggestions heard. Thus generated views on e-forum will be supplemented with that coming from discussion forum that we organize in Institute of Medicine, Maharajgunj Medical Campus, Kathmandu, Nepal and other similar venues.

Start discussing. Make your unique voice heard to the global community at PHA3.

Thank you very much.

Know US

Students' Circle Logo

People's Health Movement Nepal - Students' Circle

Peoples Health Movement Nepal Students Circle is a group of dynamic and energetic young minds sensitized by historic people's health movement to raise voice for peoples' right to equitable and quality health for now and forwarding solutions to address it at regional, national and international

level. It is affiliated to national PHM Nepal Circle and Global PHM Secretariat.

Inspired from historic people's health movement of the past for health for all, a new initiative has been taken from Nepalese students to establish People's Health Move-

ment Nepal Students' Circle to foster the ongoing "People's health movement for health for now" from student's little and meaningful contributions. It has hearty acknowledged the Peoples Health Charter and envisaged to be guided upon it.

Purpose

Peoples Health Movement Students' Circle is in coalition with PHM international students Coalition, PHM Nepal and PHM Global in terms of its philosophical principles. The students' circle believe that the students have the power and responsibility in affecting positive social change and creating a framework for action towards an equitable, just, sustainable, and inclusive vision of health for all. We will achieve this by interconnecting local, national and international struggles, inviting all students and student organizations who support the

Mission

The PHM Nepal Students circle envisions a world where people receives equitable, universal health care to all people regardless of any distinctions whereby students, as indispensable change agents, are valued partners in decision making at all levels.

Principles

- We understand good health is based on justice and human rights, and is primarily affected by socio-economic and political environment. We advocate for universal and free health care to all regardless of any distinctions.
- We are compelled to act against the broad injustices of systems and structures that sustain and perpetuate inequity and oppression.
- We challenge the privatization, commodification, and corporate domination of all human rights including rights to health, education, housing, food and water, and environmental security.
- We reject the persistent exploitation of the global South by the global North. We advocate for greater role sharing for global north in decision making in international developmental agendas including health.
- We stand in solidarity with all people, and act to end any form of discrimination, marginalization - including those based on class, color, ethnic background, religion, gender, sexual orientation, age, and abilities.

General Objectives

To act and advocate for health system which provides equitable, universal health care to all people regardless of distinctions based on class, color, ethnic background, religion, gender, sexual orientation, age, and abilities, from students efforts and contributions and others support.

Specific objectives

1. To act and advocate for a health system which provides equitable, universal health care to all people
2. To aware and sensitize the students, professionals and others on the global public health challenges, actions and people's health movement to address it

Activities of PHM– NSC

PHM Public Lectures

People's Health Nepal Students' Circle has envisaged conducting regular public lectures in pertinent issues of public health by scholars from different fields. PHM lectures are targeted to students, professionals and others who have interest to pursue understanding in global public health problems and agendas for people's health. The lectures are of brief duration and resourceful in nature. The debut lecture in PHM lecture series was given by world famous PHM activist Prof. Dr. David Sanders on 2nd March 2012.

PHM Discussion Forum

PHM Nepal Students Circle conducts regular discussion forum in different public health issues at local, national and in global level. PHM discussion forum are conducted in regular basis among the students, professionals and distinct faculties of Institute of Medicine. Forums are participatory, interactive and solution orientated. It uses different audiovisual methods with the blends of different fun games to increase the participation.

Health For All Now!

PHM Theater

PHM Theater is a unique of its kind and has been devised to address the students and professionals demand for Info-tainment. Where the inspirational, interesting films, documentaries and dramas with abundant public health messages are shown. The first in PHM Theater was SICKO, a drama by Michael Moore. The movie compares the for-profit, non-universal U.S. system with the non-profit universal health care systems of Canada, the United King-

PHM Advocacy and Activism School

With regards to the activist in PHM students' circle need for capacity building in advocacy and activism.PHM Nepal Students Circle organizes regular advocacy and activism schools to sharpen their capacity. PHM School is free for all activist and where the trainer and trainees
